

Mythbusters #3

Myth: Science has killed God

St Annes Ryde
ANGELICAN CHURCH

Greg Burke

10/8/2008

1. The myth under the microscope

“God is dead”

Richard Dawkins “The God Delusion”

Christopher Hitchens “God is not great”

2. Science and the “god of the gaps”

3. Putting science to the test

Mind / brain and the panadol mystery

Body / “Soul”

Science can get it wrong - blind faith in “science” is misplaced

Science can be misused - blind faith in human nature is foolish

How comprehensive is a theory of everything?

A kiss A painting Love Sacrifice value/s

4. The heart of the matter: Creation and Evolution

Evolution answers the “How?” and “What?” of creation (Mechanism)

Genesis (the Bible) answers the “Who?” and “Why?” (Relationship)

Intelligent design -

making the Bible sing the scientific song.

Evolutionary philosophy -

making science sing a religious hymn

5. Science and the Bible -

All truth is God's truth

=> Science properly done will not conflict
with the Bible properly understood

The shameful example of Galileo

Kepler: “Science is thinking God's thoughts after him”

5. Has science killed God?

NO: God is alive and well in our “scientific” age
